HR Software Graduate Trainee Ontum Education, Bangalore

Bangalore, 28th Nov 2021

Application for a consulting internship cum full time position at Ontum Education Bangalore

Dear Sir/Ma'am,..

Hereby I apply to the "Software Graduate Trainee" position in the Bangalore Office. I would be available for this internship for the entire period mentioned in JD.

In 2022, I will graduate from the CMR Institute of Technology Bangalore having completed four years of Bachelor degree in Engineering. Parallel to that I'm doing a data science internship in spark foundations and my MERN stack internship starts earlier next month. I have learned various technologies like Java, Python, OOPs, DBMS, SDLC, HTML, CSS. Apart from this I'm learning machine learning and Node.js. This helps me to solve problems in many domains.

Besides my mentioned studies I attended 2 workshops on IOT where I learned how to interact with hardware using software and applied it by making a project on automating the light bulb. I have also done online courses on Python and ML. I did group projects using my skills which I had mentioned in my resume and uploaded in my github account. I have heard the position for "Software Graduate Trainee" is open in your company via. Our college placement drive, I'm very keen to work in your company.

I am very much confident that my skill set would make me a great candidate for this position as well as a great asset to your company. I appreciate your consideration and look forward to hearing from you.

Sincerely, Sanjay Patil
